Afterlife: A Fresh View From the Animals' Perspective

Where: Bear Creek Vet Alternatives 7509 S. Tamiami Trl, Sarasota

When: Sunday, April 29th, 1:30-3pm; \$10 in advance, \$15 at door

Animal Communication is telepathic communication with animals, and it is the animal world's natural way to communicate with each other and us. They love it when we "tune in" telepathically to their needs and opinions. This workshop focuses on themes that come through the Animal Communication process. The animals are nearly always positive about the crossing over experience and the afterlife. This workshop is fun and enlightening!

- **What is the animals' opinion of death?**
- **What do they experience as they are crossing over?**
- **Where do they really go?**
- **How can we best serve them as they are transitioning?**
- **What about the animals who are left behind?**
- **How do the animals suggest that we cope with our loss?**
